Pastor Poetsch Leaves.

The auction at Pastor Poetsch's residence on the 19th was fairly successful, and the reverend gentleman left with his family on Friday, by train, for their new home at Edenwald, Sask. On Tuesday the 12th the Pastor and Mrs. Poetsch were given a farewell party by members of the congregation, when the worthy couple were recipients of handsome mementoes of their stay in the district.

No Services were held at St. Matthew's Church on Sunday last, but services will be resumed on Sunday next, the 24th, in the afternoon. Following this service, there will be a meeting of the congregation to decide on future action.

Moving the Phone Exchange.

The Alberta Government Telephone Exchange, which has been located at the present site for the past 25 years, will be located at the new site, across Main street, and opposite the Hardwick Departmental Store. The removal has necessitated a lot of work, transferring the telephone cables from the old Hutter building to the new Binner building. The original plan was to run the cable connections along First ave to the Town Hall corner, but this was changed, so the longer route was chosen via Second av. The new layout will be in larger and more convenient quarters, and a 5-year lease has been given at what is said to be a much lower rental.

Kulak—Bander.

On Thursday, November 14, at the Parsonage of St. John's Lutheran Church, at Blueberry, Miss Katherine Bander (daughter of Mr. and Mrs. Adolf Bander of Onoway) was united in the holy bonds of matrimony with Mr. Emil Kulak (son of Mr. and Mrs. Valentine Kulak, of Onoway). The officiating clergyman was Rev. H. Kuring, the pastor.

Egg-grading Station to Move.

Mr. Ch. Lory, the local egg-grader, who has been located in the Brick Bank building for the past 8 years, is moving over to the Horn Building on First street, opposite the Max East shop. It is stated that the ground floor of the Brick building will be used as a realtor's office.

New Dollar Bill for the U.S.A.

Maybe it's possible that we may not see many of 'em this far north, but the United States Government this month is issuing a new dollar bill said to be 'the handsomest ever.' For the first time on any U.S.A. money there will be printed a picture of both sides of the Great Seal, which was adopted in 1782, even before the Constitution was drawn up. This will be on the back, and on the front will be several changes of design, including the new way of printing signature.

Difficult Problems

The problems which it may be expected will be discussed at the pending conference between representatives of the Federal government and premiers of the Canadian provinces will furnish plenty of material for conversations and negotiations.

If only one half of the difficulties which the western provinces have recently experienced and still are experiencing in finding sufficient revenue to maintain their ordinary services, to saying nothing of contributing substantially towards the cost of relief, can be removed a forward step will have been taken, and representatives of the provinces will leave Ottawa with something a little more tangible than hope for speedy recovery and for future progress.

One of the factors in the present situation that will have to be faced squarely is the fact that the cost of government is pressing heavily on the taxpayers, that there is just so much money available for the upkeep of services and that a shifting of burdens from one unit to another is not the way out of the trouble, though it may be a temporary palliative.

If several buckets are dipping water out of a well which is not being replenished from natural sources it is only a question of time when the well will run dry, and in the long run it does not make very much difference which of the buckets took most of the water out of the well.

That is actually the position of the taxpayer in western Canada. There are three buckets drawing on his resources, the federal, the provincial and the municipal, the last-mentioned, of course, including the schools.

The permanent solution of the difficulty lies not so much in a decision as to who is to be the biggest bucket, or the least, water from the well but how the well is to be replenished, and until this can be determined, those in authority will have to address themselves to the task of finding ways and means of conserving the presently available supply and making the utmost of it.

There are many ways in which a conservation policy might be put into effect and one of the most practicable would be to eliminate a good deal of duplication and overlapping of services which have grown up, apparently without any blame attachable to any one in particular for the situation.

There are, for example, services which are being provided by both federal and provincial governments resulting in double costs for machinery and operation, in addition to a degree of confusion and ineffectiveness attendant upon two unrelated organizations trying to reach the same good by different roads.

In this category might be included debt adjustment machinery and to some extent agricultural services rendered by both federal and provincial administrations. These are only cited as illustrations of a number of fields of endeavor in which co-ordination of effort by a merger of duplicated services would not only bring about greater efficiency but would also save considerable expense to the taxpayers.

It is true that in connection with these and other activities in the same category objection might be raised that dual services are essential because of the limitations of legislative competence, but if that is the sole barrier in the way of economy, then necessary legislative authority to displace the difficulty should be sought and doubtless could be secured if a spirit of true co-operation on the part of all concerned is evidenced.

In the matter of sources of revenue also there is duplication which should be eliminated by a better defined allocation of spheres of taxation as between the several governing units. There should not, for instance, be two income taxes with two sets of costly machinery to gather the same type of tax from the same taxpayers, necessitating a double expenditure.

In pre-war and pre-depression years the fields of taxation were fairly well defined and understood and governments, in those days, confined their revenue collection efforts within well defined channels. First departures from recognized practice and prerogative came with the emergency demands of the war and subsequently, as financial and economic stringency became more severe, governments were loath to abandon what they had gained.

On the contrary, the practice of encroaching on one another's sources of income assumed serious proportions as the level of the water in the well declined and the demand for more and more water grew with greater intensity.

With this situation confronting them, the participants in the conference will face a difficult task. While, no doubt, many suggested methods for replenishing depleted incomes will be offered, first thought probably will be given to conservation of the existing resources, and one of the most practicable means of doing this will be to stretch the tax dollar by eliminating duplication. This can be done, not only without impairing the services involved but should result in improving them and at a lesser cost.

The official edict has gone forth that the new styles for the ultra fashionable gowns will not embrace any wisp waists. There will, though, be a sting in the price.

Although the feathers of silkies may be either white or black, their skin is always black. They are the Negroes of the fowl race.

Harvard finds that the interior temperature of an ordinary star is 2,000,000,000 degrees. With a 19-year-old admiral in pursuit, it is naturally more.

Stone Mountain is a massive dome of muscovite granite in De Kalb county, Georgia, and is said to be the largest in the world.

Finds Blindness No Handicap

War Veteran Has Developed Memory To Remarkable Extent

Captain Gerald Lowry, a blinded veteran of the World War, recently was one of the champion pair at the British Bridge League Congress at Harrogate, England. His partner was a woman. Not only did they win but they were always the first pair to finish their hands.

Blindness has its compensations. Nature to some extent redresses the balance by developing other faculties. Captain Lowry is a remarkable example of overcoming the handicap and lives a more active and normal life than most people. He has developed his memory to such an extent that when a friend whispers the designations of his cards to him he remembers them throughout the game and where he has arranged them. When he has to play dummy, the cards are named to him and he remembers them, too. The rest is easy. During the Harrogate tournament he played 32 calls and never forgot a card.

Captain Lowry before the war was an ardent golfer and amateur boxer. He still plays golf and boxes. He uses his own ball and drives by instinct. His caddy tells him where his ball lies and where he should hit it, and he never misses. He also learned osteopathy and has built up one of the most lucrative practices in London. —St. Thomas Times-Journal.

Began In Ice Age

Scientists Believe Recent 'Quake' Originated 25,000 Years Ago

Persons whose sleep was interrupted by the recent earthquake may blame it on the great Ice Age.

It is at least 25,000 years since the Ice Age ended, scientists estimate, but it was these same scientists who fixed its guilt.

Dr. L. C. Conant, director of the Cornell University seismological station, explained the general theory of earthquakes in the northeast is the earth is gradually recovering from the burden of a sheet of ice one to two miles thick.

"The melting of this tremendous glacier," he said, "took a tremendous pressure off the earth's crust. Every once in a while the earth stretches back a bit, moving just a trifle upward and northward. As a matter of fact, our instruments indicated there was a slight tilt to the north."

Bigger Braille Library

Books Are Larger And More Space Is Required

The rebuilding of part of the National Library for the Blind, in Great Smith-street and Tuford-street, Westminster, England, which has now been completed, provides extended accommodation for about 250,000 Braille volumes, together with up-to-date facilities for receiving and despatching books and music on loan to blind readers in the British Isles.

Considerable storage space is required in a library of this kind, an average Braille volume measures 14 inches by 11 inches, and weighs five pounds.

The number of volumes circulated averages 1,200 per day.—Overseas Daily Mail.

Are You Run-down, Tired?

Mr. Mabel Murphy of 13 Westinghouse Ave., Hamilton, Ont., said: "About five years ago I was run-down, tired, had indigestion, could not get any sleep, lost strength, and my weight dropped. I had finished the first bottle of Dr. Pierce's Favorite Prescription. I felt much better, had more strength and better digestion. Now six, tablets 25 cents, liquid \$1.50. Large size, tablets or liquid, \$4.50."

I had finished the first bottle of Dr. Pierce's Favorite Prescription. I felt much better, had more strength and better digestion. Now six, tablets 25 cents, liquid \$1.50. Large size, tablets or liquid, \$4.50.

Cannot Get Italian Marble

League of Nations' sanctions against Italy have created an unusual situation in connection with the new League palace which was scheduled to be occupied in November. Most of the Rose marble used in construction of the palace comes from Italy, and much of it is still due to arrive. League sanctions prohibit the reception of goods under existing contract, so the League must look for its marble elsewhere.

Lithium, potassium, and sodium, the three lightest known metals, will float on water. 2125

Science Tackles Lipstick

Produce Miracles With The Aid Of Delicate Scales And Chemical Reactions

As the result of exhaustive laboratory experiment, chemists have succeeded in reducing lipstick manufacture to an exact science. The relation of the temperature of the lips, the degree of moisture and the influence of fats are now expressed in scientific equations.

The bloom of human lips, long celebrated in song and story, has been accurately measured with the aid of delicate scales and chemical reactions. The new scientific lipsticks produced in German laboratories and recently demonstrated at the Leipzig fair, are said to be contact proof, moisture resisting and to assure a uniform appeal for days on end.

1935 Tobacco Crop Valued At \$8,000,000

Flue-Cured Tobacco Industry In Ontario Run On Scientific Lines

It looks as if the \$8,000,000 valuation put upon the Ontario flue-cured tobacco crop by the experts will be exceeded by the value of the actual production by Canadian and British manufacturers within the past few days. Yet it is only a few years since tobacco raising in Canada was practically limited to a few farmers raising it for personal use or for a limited local market. Now approximately 30,000 acres of the best soil in Southern Ontario are almost exclusively devoted to the growing of tobacco leaf in a scientific way, this year's crop amounting to 35,000,000 pounds, and having a selling-value \$8,000,000 in excess of the crop return of 1934. The finest cigarettes and other tobacco products in Canada incorporate Canadian tobacco in large and increasing quantities, where, hitherto, American and other tobaccos had been used, while the Canadian leaf also has an excellent market in Great Britain in competition with foreign imports.

The Imperial Tobacco Company of Canada, Limited, which buys a great part of the Canadian crop, has had much to do with the great strides taken by the tobacco-growing districts because it has had a policy for years of trying to encourage domestic production. First, however, it was necessary to gradually teach growers what and how to grow in order to meet public tastes long accustomed to foreign leaf. The company, at its own expense, imported cultivation experts, brought in the necessary plants for experimentation, made its own chemical and other researches of the soil, of moisture, and other conditions contributory to the best grades of tobacco, taught the grower on his own land by introducing experimental plots, and in other ways interested him in improving and enlarging his crop for the use of the domestic market. It also illustrated to him the precise processes by which the domestic market might be developed in a profitable way. This, and the researches of government experts combined largely to produce the present condition, and to the creation from a small and unmarketable crop, a large and marketable crop, valued at more than \$8,000,000 a year.

London's Debt To Thames

City Is In Real Sense Founded On Slips

Its growth into the largest city of the country and of the world is owed by London to many historical accidents and to one very important fact—its geographical position. The rest of government might have been elsewhere and London might have had to share its political ascendancy with Winchester or New York. But it was almost inevitable that a large trading community should be established around the lowest bridge on the Thames, which flows into the narrow seas heading to the Continent and to the world. The Thames is the root cause for London's existence, and the city is in a very real sense founded upon ships.—P.L.A. Monthly.

BACKACHE

IF you have backache, dizzy spells, headaches, do not neglect your kidneys. Take Gin Pills for prompt relief at the first sign of these symptoms. You will feel better, look better—be better, if your kidneys are functioning properly.

Crochet a Rug For Your Home

Household Arts by Alice Brooks

This Rug and Pillow are in Three Colors

PATTERN 5469

Whether you use rugs, rug wool or candlewick, you can make a stunning crocheted rug if you use this design. Three tones of one color or contrasting colors are effective. Use it in the bedroom, living-room or entrance hall—it will add much to your home. And the pillow matches it, thus repeating the decorative note. You'll find it an easy pattern to crochet. It is just the thing for someone something real big for Christmas, this would be a splendid choice.

In pattern 5469 you will find complete instructions for making the set shown; an illustration of it and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Pioneers Honored

Calm Unveiled By Founder Of First Icelandic Settlement

The dramatic history of Icelandic pioneers who first landed on the shores of Lake Winnipeg in 1875, was fittingly marked 60 years after when a memorial was unveiled at Gimli, Man., by Captain Rigtrygir Jonason, first discoverer of the site of what is now Gimli.

Jonason, approaching his 80th year, brought the first group of Icelandic settlers to Gimli in 1875 from Moorhead, Minn., by way of Winnipeg. The party made the trip in scows constructed in Winnipeg, and sailed down the Red river and along the west shore of Lake Winnipeg to their new home.

The cairn, built of local granite stone, has a 13-ton red granite boulder fixed to the top, symbolizing the lasting qualities of the early pioneers. On the west side of the boulder, engraved in Icelandic and English, is the following inscription: "The first Icelandic settlers arrived here Oct. 21, 1875." The names of the various districts of the first settlement are carried on the reverse face of the cairn.

Climbing Out Of Depression

British Dominions Seem To Be Leading The World

Which are the nations who are climbing most rapidly out of the depression? They are the British nations. Canada's trade leaped up 22 per cent. last month. Inspiring news comes also from little New Zealand, where Mr. Coates, the finance minister, boldly states that the Dominion's economic problems are "largely solved". Cuts are being restored, emergency taxes reduced, pensions increased. On top of that Mr. Coates gives a new break to his countrymen. Population of New Zealand, 1,618,000; public works expenditure announced, \$5,630,000. That means the inauguration of new boons and amenities for New Zealanders at the rate of \$3 10s a head.—London Daily Express.

SUNDAY SCHOOL LESSON

NOVEMBER 24

THE MESSAGE OF HAGGAI

Golden text: I was glad when they said unto me, Let us go unto the house of the Lord, Psalms 122:1.
Lesson: Ezra 3:1 to 6:22; Psalm 84:1-12; Haggai, Chapters 1, 2; Zechariah 4:1-14.
Devotional Reading: Psalm 122.

Explanations And Comments

Combating the Mental Attitude of the People, Haggai 1:1-4. The address of the prophet Haggai was made to Zerubbabel, the governor of what was now the Persian province of Judah, and to Joshua, the high priest, in the sixth month, in the first day of the month, in the second year of Darius the Persian king, B.C. 520.

"It is not the time for us to come, the time for Jehovah's house to be built," the disheartened people were saying, but Haggai was sure that it was the time God would have them build. They were waiting for the right time, the psychic moment, as it were, to build, but they had not waited for the time to build their own houses, the prophet reminded them. Some of them had built exceptionally fine houses, paneled with costly cedar, but the site of the house of Jehovah was still lying waste, although they had now been living for 15 years in Jerusalem. The trouble was that they lacked the desire, and Haggai used forcible words to arouse their desire. If they really desired the temple, they would build it.

The people had sown much and brought in little. A drought had been upon the land, withering everything (verse 11); they had lacked food and drink enough to satisfy themselves, and clothes enough to keep them warm; and so low were the wages that it seemed as if the money was lost as soon as it came, as if it just dropped through holes in a bag. All this was true: what was the prophet's remedy? He challenged their conscience. "Now, therefore, thus saith Jehovah of hosts, Consider your ways," he twice repeats. Consider "what you have been doing. All had been so anxious building their own homes, and had given no thought to the house of Jehovah, verse 9. They had only themselves to blame.

Ye looked for much, and, lo, it came to little; and when ye brought it home, I did blow upon it. Why said Jehovah of hosts. Because of my house that lieth waste, while ye build ye have said, Our own houses. Therefore for your sake the heavens withhold the dew, and the earth withhold its fruit.

The Result of Haggai's Appeal, Haggai 1:12-15. Within three weeks the temple site presented a busy scene, for, inspired by the prophet's words, the governor and the priest and the people all began to work upon the temple building.

Endorses Light Clothing

Welsh Doctor Believes It One Preventive Against T.B.

During a discussion on his annual report, Dr. Milton Jones, medical officer for Llanfyllin rural council, said he found girls under 20 were less susceptible to tuberculosis than boys under 20 and said the reason was that girls wore scanty clothing, which allowed sunlight and fresh air to get at them. Women, too, were less susceptible to tuberculosis than men because they wore less clothing.

When the doctor said that with correct diet nobody need suffer from indigestion a member remarked that doctors suffered from indigestion. Dr. Jones replied that that was because doctors were so often called away from their meals.

One large duck farm in Eastern Canada is planning to ship 2,000 boxes of ducks to England before the close of navigation at Montreal and to hold them in storage for subsequent sale.

ASK YOUR DOCTOR FIRST, MOTHER

Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons—instead of their doctors—on remedies for their children.

If they knew what the scientists know, they would never take this chance.

Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, over 50 years, have said "PHILLIPS' Milk of Magnesia"—the safe remedy for your child.

Remember this—And Always Say "Phillips' When You Buy. Your child deserves it; for your own peace of mind, see that you get it—Genuine Phillips' Milk of Magnesia.

Also in Tablet Form:

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores. Buy the one which has this label—the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

PHILLIPS' Milk of Magnesia
MADE IN CANADA

Fire Chief Battles Water

Rescued People From Flooded District In Montreal

Arthur Ferron, acting district chief of the Montreal fire department, has celebrated the 30th anniversary of his joining the fire fighters. In the years since he joined the brigade he has been repeatedly decorated for brilliant rescue work at bad fires, but his greatest rescue had nothing to do with his arch enemy, in the half light of a below-zero dawn, a three foot water main burst in a crowded Montreal district. The streets were flooded and houses were collapsing when Capt. Ferron and his crew arrived. Despite the imminent danger, however, this veteran smoke-arrester rescued two entire families who were on the point of drowning. For his bravery he received the Royal Canadian Humane Society's life-saving medal.

Warehouses At Calgary, Edmonton, Regina and Winnipeg

MAY ESTABLISH AIR MAIL ROUTES ACROSS CANADA

Ottawa.—Aviation interests are in the conference to be held here towards the end of the month between representatives of the United Kingdom, the Irish Free State, Northern Ireland and Canada, a prelude of considerable development in transcontinental aviation in this country. For some years after the war great strides were made in Canadian flying, but the era of administrative economy that descended on the country five years ago called a halt to this progress.

Flyers take the stand that to establish a trans-Atlantic air service only would be an expensive and unfinished policy. In order that full benefits be derived from it, they declared, there must be a steady and progressive development in the transcontinental services in Canada itself.

At one time postal and passenger services operated from Rimouki to Montreal. There the United States lines were picked up and air travellers could cross the continent to Canadian points by using the United States lines from Albany to Grand Forks, N.D.

Canadian services ran from there to Winnipeg, and westerly to the Rockies. As an alternative route air travellers could fly from Montreal to Toronto and Detroit, picking up the U.S. lines at that city.

Cutting down of the government air mail, however, made the Canadian lines unremunerative and they were gradually dropped. Only a few air mail lines are now maintained, and there is no exclusively Canadian trans-continental service.

Those interested in aviation expect that, should the Imperial Airways establish its trans-Atlantic service, the Canadian government will re-enter the field by establishing the old air mail routes. It is expected also that, instead of Canadians being dependent on United States lines to cover the gap from Montreal to Winnipeg, advantage will be taken of the work done in the past four years in building landing fields north of the Great Lakes. There are now between 80 and 100 emergency landing fields either completed or approaching completion, thus creating a purely Canadian flying route from the Atlantic to the Pacific.

Tales Of Heroism

43 Persons Rescued From Shipwreck
By Destroyer

Manila.—How survivors sang on wave-lashed rocks to keep up their spirits as they saw comrades die was told here when the destroyer Perry docked with 43 persons rescued from a boiling sea where the freighter Silverhead crashed.

Tales of heroism and horror revealed one woman victim went insane before drowning and that the vessel's missing captain surrendered his life belt to a crew member, then disappeared while trying to save his pet dog.

Bodies of two of the disaster's four victims were brought here by the destroyer. Practically all the survivors were suffering from exposure or minor injuries and two crew members who contracted pneumonia were rushed to hospitals.

The vessel, carrying five passengers and a crew of 49, crashed while en route here from San Francisco, but all survivors were rescued by raft.

On these, the survivors floated out to where rescuers from the Perry and the destroyer Bulmer could pick them up.

Other survivors told how Capt. H. A. Lennard surrendered his life belt to an unprotected crew member as the last raft was ready to leave the rock for the rescue craft, 1,000 feet away.

When all others were aboard the raft, the captain tied his small dog around his neck and plunged into the water. He swam a short distance, but the dog's weight and the waves were too much, and both disappeared in the turbulent waters of the Philippine straits.

Air Route Over Rockies

Pass In Northern British Columbia Discovered As Ideal
Vancouver.—A 100-mile-wide gap in Canada's towering western mountain ranges was described as near perfect for a trans-Canada air route by Dr. Charles Camsell, federal deputy minister of mines, told delegates of the western meeting of the Canadian Institute of Mining and Metallurgy.

He discovered it during his recent aerial tour of northern British Columbia, southeastern Yukon and the region from the Mackenzie district to the Arctic ocean.

Far up in British Columbia's hinterland close to the borders of the Yukon and the Northwestern Territories, the Rocky Mountain range pinches out and between there and the start of the Mackenzie range is the gap which is the only wide opening of the Canadian cordillera, Dr. Camsell said.

It offers far less hazardous flying conditions than any other gateway to the coast, he said, not only because of its width but because it has from 1,000 to 1,700 feet less altitude than other mountain passes, and in addition is of a flat plateau nature with easily adaptable landing features.

In addition to his important exploration of hitherto unknown territory, Dr. Camsell exploded the myth of the so-called tropical valley in the Liard river district.

"I've been there in winter and in summer and there certainly is no indication of tropical climate or vegetation," he said. "True, there are a number of hot springs, some of which do not freeze over in temperatures of 30 degrees below zero, but they have no effect on the climate. They do affect the vegetation to a certain degree, however, and the grass grows as high as seven feet with other vegetation correspondingly luxuriant."

Check Wheat Board Work

Meeting Of Sub-Committee Was Merely General Survey

Ottawa.—Checking work on the Canadian wheat board, a sub-committee of the cabinet given direct jurisdiction over activities of the body held a lengthy meeting. The conference was described as a general survey.

There was no intention to force Canadian wheat on the market even at sacrifice prices, it was said following the sitting. Minimum price for No. 1 Northern at Fort William was fixed at 87½ cents a bushel as one of the first official acts of the wheat board which was named early last summer.

All heading departments closely allied with the wheat industry, Hon. W. D. Eider, minister of trade and commerce, is chairman of the sub-committee, with Hon. Charles Dunning, minister of finance, and Hon. James G. Gardiner, minister of agriculture, as associates.

Landed Passengers Safely

Pilot Suffered Heart Attack But Stuck To Control

Bakersfield, Calif.—Captain Donald Buckman, 34, United States army pilot, won and lost an air dash against death when he safely landed three passengers at the airport here, only to collapse and die a few minutes later. Flying from March field, Captain Buckman apparently was seized with a heart attack as he raced through the air. Slipping to the control, he brought the plane down without mishap at Kern airport, and then disclosed to field attaches that he felt ill. He died 20 minutes later.

Research Library Closed
Montreal.—Without financial support for the past two years, the Great Chinese Research Library, considered one of the finest of its kind in the world, has been permanently closed to the public. It was unofficially announced the library would be placed in storage immediately.

Judge For Seventh Year
Chicago.—For the seventh year, Walter Biggar of Dalhousie, Scotland, will preside as judge of the international livestock exposition, it was announced. Biggar, a noted livestock authority, will begin judging when the exposition starts on Nov. 30.

SIR BASIL BLACKETT

One of the most eminent of British financial experts, who was killed in Germany when a train struck his automobile. He visited Canada in 1932.

Wheat Crop Less

Second Estimate Shows Production Lower Than Expected

Ottawa.—The Dominion bureau of statistics estimated Canada's 1935 wheat crop at 273,971,000 bushels, about 2,000,000 bushels less than that of 1934.

The crop report containing the second estimate of the wheat yield brought production down from a Sept. 11 estimate of 290,541,000 bushels to place it slightly below the 1934 yield while estimated yields of most other cereal crops were higher than those of last year.

The report said the 1935 season was similar to that of 1934 in that threshing returns did not fully substantiate first estimates of grain production.

Oats at 416,369,000 were almost 33,000,000 bushels less than in the Sept. 11 estimate but still well above the 1934 production of 321,120,000 bushels.

The report said reduction in this year's estimates was caused mainly by frost damage in Saskatchewan and Alberta. The bureau was forced to reduce the barley estimate by 7,000,000 bushels while flaxseed and rye also came down as threshing returns failed to support previous computations.

An Italian Reprisal

Suppliers For London Perfumery Firm Withdraw Credit Facilities

London.—An Italian action, believed to be the first reprisal against Great Britain for imposition of League of Nations sanctions, was reported by the British press. A London firm of perfumery manufacturers received a cablegram from its suppliers in Italy, reporting its credit facilities there had been withdrawn.

Coming To Canada

Ottawa.—A delegation of British textile manufacturers is now on the way to Canada to attend the tariff board hearings in connection with rates of duty on cotton and other textiles next month.

THE NEW DUKE AND DUCHESS OF BUCLEUCH

With the recent death of the Duke of Buccleuch, father of Lady Alice Montagu-Douglas-Scott, wife of Prince Henry, the Duke of Buccleuch succeeded to his father's title. Here we see the new Duke and Duchess of Buccleuch.

Canadian Wheat Board

John I. McFarland May Continue As Head

Ottawa.—Reports here say John I. McFarland may continue as head of the Canadian wheat board. While the future of the board is a matter which has not been considered finally by the new administration, it has been understood he likely would be asked to continue and in this event he would remain long enough to bring his marketing policy to a conclusion.

Named last August, the other members of the board are D. L. Smith, vice-chairman, and H. C. Grant, all of Winnipeg. So far at any rate no requests for resignation have been sent to Mr. McFarland's associates, it was stated.

Record Flight

Jean Batten Crosses Ocean In Thirteen Hours

Pernambuco, Brazil.—New Zealand's young and adventurous girl flyer, Jean Batten, stepped from her aeroplane at Natal, being the first of her sex to fly alone across the South Atlantic.

She flew 1,281 miles from Thies, French Senegal. Her time of 13 hours and 15 minutes for the ocean hop bettered the solo record set by the Spaniard, Compo, of 19½ hours. The youthful flyer, who took off from Lympne airport near London, also broke the record set by Capt. James Molliken of 82 hours and eight minutes from Lympne to Natal. She made the flight in 61 hours 15 minutes.

Permit Not Renewed

Correspondent For Nazi Newspaper Cannot Stay In England

London.—Leopold Von Hoersch, German ambassador to Hoon, called at the foreign office for an explanation of the non-renewal of the permit to stay in England of Dr. H. D. Thost, whom the British press generally considers liaison officer for Adolf Hitler.

It was officially stated Dr. Thost's permit was not renewed "in the public interest." No protest or representations had been made, it was said.

Dr. Thost's announced post, was that of correspondent for the Nazi newspaper Der Angriff. He left by planes for Berlin.

To Be Deported

Man And Woman, Held At Request Of British Authorities, To Be Returned To England

Quebec.—Deportation to England was ordered by Canadian immigration officials here for the man and woman held here at the request of British authorities under suspicion of complicity in the \$20,000 jewel theft from the London home of the Earl of Fortington on Nov. 5.

The deportation order was announced on conclusion of an official enquiry into the couple's right of entry into Canada. The chief immigration officer at Quebec stated the pair were considered undesirable.

IMPORTERS OF BRITISH GOODS TO ASK REFUNDS

Ottawa.—Opening the door to a volume of applications for refunds from importers of British goods, a judgment has been handed down by the exchequer court of Canada in a test case ruling the minister of national revenue had no power to collect dumping duties on goods entering Canada from Great Britain since Nov. 25, 1932, following the Canada-United Kingdom trade agreement.

At that time the Customs Act was amended to exempt British goods from dumping duties under arbitrary valuations by the minister of national revenue. However, arbitrators' values continued to be levied.

The case was that of Blake and Company, Toronto, importers of hats from Great Britain. Under the decision the refund that other importers might ask on the strength of the judgment would be considerable, although national revenue officials were not prepared to make an estimate.

The decision confirms rulings of the tariff board more than a year ago in appeals of Thomas Bonar and Sons of Montreal, importers of furs twine from Shale and Blake, a company that orders-in-council assign arbitrary valuation of British imports coming in under the British preference were invalid.

Food Supplies Available

Manitoba Farmers In Crop Failure Area Receive Help

Winnipeg.—Food supplies to replenish lean larders in a triangular community affected by crop failure on the northwestern shores of Lake Winnipeg were ready for shipment last week. Relief officials were busily engaged in a check with municipal officials to ascertain further needs.

"The government of Manitoba would undertake that no person would go hungry," said W. C. Chubb, Manitoba minister of public works, told a deputation from the federal constituency of Selkirk. Municipal officials declared a large number of farmers were without enough to eat.

The district affected includes the rural municipalities of Gimli, Bifrost, Armstrong, Erickdale, Coldwell, and Rockwood. Majority of the farmers cultivate small parcels of land to mixed farming. They grow only enough wheat to supply themselves with flour.

Seek Further Loan

Alberta Government Needs Funds For November Financing

Edmonton.—Federal loan of \$2,000,000 to carry the Alberta government until the end of November if the province's general application for financial assistance cannot be submitted to Ottawa before the Dominion-provincial conference on Dec. 9, has been applied for, Premier Albertab said.

"We have made this proposal to Hon. C. A. Dunning, minister of finance. There has been no reply yet," said the premier.

The Alberta government is anxious to have an earlier conference with the Dominion in order to submit its financing proposals, which also involve a refunding scheme. As the Ottawa conference was postponed, the province faces the problem of handling this month's financing.

Value Of Education

Theory That There Has Been Too Much Education Is Termed False
Wolville, N.S.—The theory that too much education had been one cause of the depression was termed "false" and "stupid" by Dr. H. M. Tory, former president of the Atlantic Research Council of Canada, in receiving an honorary degree of doctor in civil law from Atlantic University.

"As people rise in intelligence," he said, "so does the standard of life. He declared modern science had created far more jobs than it had destroyed."

MAN WANTED for Rawleigh Route of 800 families. Write today. Rawleigh, Dept. WGR-96 SA, Winnipeg, Man., Canada.

Notes of Sports.

The flooding of the skating rink has been under way this week, under the direction of Manager Eddie Enders, and the new sheet of ice is expected to shortly be ready for the skaters. The proposed improvement, to have the skating surface brought out flush with the street line, leaving a space of 12 feet alongside the curling rink wall for spectators, has not been carried out, owing to the winter season closing in earlier than usual.

But, nonetheless, the old layout will see lots of action by the local hockey players, if the promises now being made come true. The Senior players have reorganised, and the Junior stick-handlers are, as usual, eager for the fray.

The Juniors are said to be arranging for the holding of a series of whist drives, which are to be held in the town hall.

Stony Plain and District.

All those interested in curling will meet in the town hall tonight, the 21st, when plans for the coming season will be up for discussion.

Edmonton Journal readers in town were disappointed on Saturday on not receiving their daily paper. The busman had forgotten to throw off the bundle for the P.O. on his arrival here, so subscribers had to wait till Monday for a paper.

A "shower" was held last week at the home of Mr and Mrs Powell, in honor of Miss Florence McKinlay, the bride-to-be of Mr Gordon Graden.

The Man Who Knows

Whether the Remedy You are taking for Headaches, Neuralgia or Rheumatism Pains is SAFE is Your Doctor. Ask Him

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches, or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin".

We say this because, before the discovery of "Aspirin", most so-called "pain" remedies were advised against by physicians as being bad for the stomach, or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people, who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this: "Aspirin" is rated among the *fastest methods* yet discovered for the relief of headaches and all common pains... and *safe* for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

Demand and Get

"ASPIRIN"

Running Short On Food

A birthday party has been given in the Melbourne Zoo for a little platypus—an Australian duck-mole. He has set up a record by living a year in captivity. The platypus, which eats some 200 worms a day, is giving the zoo authorities a problem. The supply of worms is running out, so the curator is offering to buy worms at the rate of 3d. a pound.

Mothers Aided by Guide to Better Control of Colds

Practical Plan is Helping Families Everywhere to Have Fewer, Milder and Shorter Colds.

SIMPLE AND EASY TO FOLLOW

Already, thousands of Canadian mothers are benefiting by following Vicks Plan for Better Control of Colds—providing for themselves what is a practical home guide to fever and shorter colds.

This common-sense, medically sound Plan represents the 30 years' experience of Vicks Chemists in studying colds. It has been tested in extensive clinics by practicing physicians—further proved in everyday home use throughout the country.

Here, briefly, are the three simple steps in Vicks Plan:

1. To Help Build Resistance to Colds

Live normally—avoid excesses. Eat simple food and keep elimination regular. Drink plenty of water. Take some exercise daily—outdoors preferably. Get plenty of rest and sleep.

2. To Help Prevent Many Colds

At the first warning nasal irritation, sniffle or sneeze, use Vicks Va-tro-nol—just a few drops up each nostril. Va-tro-nol is especially designed for the nose and upper throat where most colds start. Used in time, Va-tro-nol helps to prevent many colds—and to throw off head colds at the early stages.

3. To Help End a Cold Sooner

If a cold has developed, or strikes without warning, rub throat and chest at bedtime with Vicks VapoRub. VapoRub acts two ways at once: (1) By stimulation through the skin, like a poultice or plaster; (2) By inhalation of its penetrating medicated vapors, direct to inflamed air-passages. Through the night, this combined, vapor-poultice action loosens phlegm, soothes irritation, helps break congestion.

What Vicks Plan can do for you and your family can be proved only by trying it. Directions for following the Plan come in each package of Vicks Va-tro-nol and Vicks VapoRub.

"The Unknown Port," etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge. Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and miss the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. The next morning Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is onerous, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they have and that they could induce others to lend her.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted the sign for the library, and the Adams worked on the shelves for the books and decorations to make the room look presentable.

Jack Nelson, Matthew Adams, and Nancy go to the prairie home of Matthew under for the ride, and after Nancy and Jack leave for home, they are caught in a blizzard. Blinded by the swirling snow they collide with a bus full of school children, which was stalled across the road with its back wheels resting in a snow-drift. Their car being wrecked, Jack and Nancy, along with the children and all they can to help. The next morning Jack sets out for help in the blizzard. He succeeds in finding help, and the party of children and Nancy are rescued. As a result of the experience, Jack is seriously ill with pneumonia, but both of them recover.

Now Go On With The Story

CHAPTER XXIII—Continued

Nancy started, smiling as she recognized the wife of the health-seeker on the back road, one of the library's most faithful visitors.

"Come in," she welcomed. "I'm leaving day after to-morrow and am glad of this chance to say good-bye."

The woman said, as she sat down in the cushioned chair: "That's why I came. I meant to stop at Miss Nelson's, but when I saw these open windows I knew you'd be here. I want to thank you for what you've done for—well, for every one in Pine Ridge, Miss Aladdin." She glanced up, her warm face lighted by a smile, while Nancy realized with something of a shock that this faded woman was quite young, probably not ten years older than herself. "Do you mind my saying, Miss Aladdin?" she questioned a bit shyly. "Sometimes I've almost wondered if that's what you are—a sort of magician who has worked miracles."

Nancy laughed, flushing a little too.

"It wasn't a miracle at all, if you mean this library. It was only common sense and a bit of elbow grease!"

"No," answered her caller wisely. "It was more than that. It was thinking how you could make life happier for other folk. It's made all the difference between exile and home, to us!" she added. "My husband's better now, really better; and it's due to nothing in the world but having good books to read—something to take his mind away from himself, and all our worries. Is it any wonder we think of you as Miss Aladdin?"

When she gave Nancy sat there feeling strangely humble, a lump in her throat that threatened to grow bigger.

"I ought to have gone to see those people," she said regretfully. "I'll ask Matt to drop in on them some day. Why, the first time that woman came for books I thought she was older than Aunt Judy! Oh, why does life hurt some of us so cruelly?"

Rising with reluctance, Nancy closed the windows. This was her

HERE'S The real way to MAKE BRAN MUFFINS, COOKIES ETC.

USE Quaker Natural Bran—because it is natural bran especially intended for baking. You'll find it makes better, tastier bran dishes with the real spicy, nut-like bran flavour. And that you'll have better results because, being natural bran, it mixes better and more lightly with other ingredients.

And what is doubly important Quaker Natural Bran is more economical for baking. Try it—there's a recipe folder and a valuable coupon in every package.

QUAKER
Natural Bran

Buttered Bran Raisin Bread
Canned Cherries or Plums Coffee
Look for the Quaker Natural Bran display at your grocer's. He has all the things you'll need for this appealing dessert. The recipe for Bran Raisin Bread is in the package.

last visit to the library, for to-morrow she must give to Cousin Columbine. The girl stood for a moment looking off at the mountain; and suddenly she longed to view it once again from the hilltop under the old pine.

"I'll sneak up back of the houses," she planned, locking the door. "If Jack sees me he'll want to go along, and somehow I'd rather be alone." She can stay a half hour, and get back before the Adams send for us. I do hope Matt will have cheered up by evening. I just can't stand the way his eyes look."

By skirting the village it was possible to gain the hilltop unobserved, but it was a steep ascent, and Nancy was breathless when, emerging from the woods, she started toward the ancient landmark. Then, as an animal will stop when suddenly alarmed, the girl stood still. Some one was there, half hidden by the gigantic tree-trunk. How disappointing! Her trust on this wonderful spot must be foregone. She ventured one cautious backward step, but a twig snapped under her foot, and the intruder, almost as startled as herself, turned quickly.

"Oh!" exclaimed Nancy. Her heart was thudding. "I didn't dream—I mean, Matt, I—I thought—"

She paused, for Matthew had sprung up, an unsmiling Matthew, who said, curiously, she noticed, as he came toward her: "Is it you, Nancy, or—or am I dreaming? No, I'm not crazy?" (He smiled a little.) "But I've been lying here for an hour or more wishing I had the power of Aladdin, so I could rub my lamp and—make you appear before me just like this Is—Is it really you?"

Nancy thought, her mouth curving in a smile. "What other fellow in the world would say a thing like that?" Then with a sudden impulse she stretched out both hands.

"Touch me, and see!"

CHAPTER XXIV

No use trying; it was simply impossible to sleep. Thus thought Nancy as she turned, and tossed, and thumped her unoffending pillow. The night was weirdly bright, as moonlight nights are in Colorado, and (perhaps because she knew where each one was), those furnishings of the tower room, which seemed so depressing eight months before, were dimly visible: the far-oriental embroidered on the "galaher"; the mineral specimen clock which never ticked; the deformed kittens painted in oils; General Grant, and Aurora's mammoth calendar.

"It's awfully strange," murmured the girl, "how you get used to things. I don't see that awful embroidered baby any more, and I've grown quite fond of General Grant. It just doesn't seem possible that this is our last night in Colorado, and that to-morrow Jack and I'll be joggling along somewhere in Kansas. Why, the day we got here, when Cousin Columbine displayed this room so proudly, I thought I couldn't get away from it too soon; and now all I can think of is—suppose we hadn't come!"

About to ponder this awful possibility, Nancy turned again and saw

that the door into her brother's room was opening. Said Jack, in muffled, irritated tones: "What the dickens is the matter with you, Nancy? That old bed lets out a groan every time you move, and I'd say you've turned over every three minutes of the last hour. Why don't you go to sleep?"

"Too much to think about. I'm figuring out what would have happened if we hadn't come to Colorado."

"That's easy," Jack seated himself on the foot of the massive bed. "I'd be earning my car fares in a broker's office most likely; and you'd be dragging 'round Edgemere, pitying yourself and running up the telephone bill by calling your long-distance boy friends every few hours, just to kill time. Honestly, sis, can you imagine living our whole lives without having known Cousin Columbine, or the Adams, or—or going through that blizzard and everything? Maybe you'll laugh, but I feel lots older than when we came."

But Nancy didn't laugh. She said, thoughtfully: "You seem older, Jack. And I—"

Her self-analysis went no further, and after a moment she went on: "I'm mighty glad old Matt's got back into his stride. All this last week he's looked like a lost dog. I don't believe he's seen a lot of girls, and was sort of scared for fear he'd taken you too—well, seriously. Matt's such a dandy feller, Nancy. I'd hate to think he'd fallen for you too hard."

"So I'm not good enough for Matthew Adam?"

(To Be Continued)

Cannot Be Answered

Food For Thought In Child's Question About Speed

The wisest answers often come out of the mouths of children. A man motoring with his family in the country and discussing with his wife the present-day craze for speed and the disastrous results that so often follow excess of a reasonable rate of travel was interrupted by his little daughter's question:

"What is the speed limit?"

"Thirty-five miles an hour," he answered.

"Then why do they make cars that go faster?"

MAKE DELICIOUS CREAM PIES

and all sorts of dainty dishes with Christie's Graham Wafers. They're nourishing and deliciously crisp and fresh. You'll enjoy them any way you eat them. There's a recipe with every box.

Little Helps For This Week

Lift up your heads O ye gates, even lift them up ye everlasting doors, and the King of Glory shall come in. Psalm 24:9.

Fling wide the portals of your heart.
Make it a temple set apart.
From earthly use for Heaven's employ.
Adorned with prayer, and love, and joy.
So shall your Sovereign enter in, And now and nobler life begin.

Thus art to know thy soul is the centre, habitation and kingdom of God. That therefore to the end the sovereign King may rest on that throne of thy soul thou oughtest to take pains to keep it clean and penitent. Clean from guilt and defilement, quiet from fear, and peaceable in temptations and tribulations. Thou oughtest then to always keep thine heart in peace that thou mayest keep pure that temple of God, and with a right and pure intention thou art to work, pray and obey as well as suffer whatever it pleases the Lord to send thee within the least moment.

Many of the farmers of Eastern Canada who fed Western lambs during the 1934-35 winter under the Dominion Lamb Feeding Project are placing increased repeat orders, in many cases asking for double the number of lambs they fed a year ago. The applications, particularly from Quebec and Ontario, reflect the abundant supplies of hay, grain, silage, and other crops in Eastern Canada.

HUNTING WITH A .22 RIFLE.

Few of the many young hunters who scour the country with a .22 calibre rifle hunting rabbits, it is safe to say, realize the carrying capacity of this weapon, says a writer in the Calgary Herald. How many parents would let their sons shoot indiscriminately, if they realised that at certain elevations a .22 short bullet carries 1000 yards, and that a .22 long is dangerous within a mile.

Yet any week-end scores of young people can be found on the hills and in the brush with these deadly weapons. They range at large, rarely seeking permission from farmers to shoot on their land. Many pay little regard to the possibility of killing or maiming individuals or stock when firing into thickly-covered brush country. Few have had instruction in the lethal qualities of this type of gun.

A recent report by a ballistic expert gives some indication of the carrying power of this small arm: "A .22 bullet drops very fast," he states, "when shot on a horizontal line; it kicks up the dirt pretty close to the gun. But that is no indication of its 'carry.' The .22 long rifle bullet falls 6 feet below the horizontal line on which it starts when shot in a 200-yard range—but it travels 1400 yds. when pointed 30 degrees above the horizontal. The .22 short bullet at similar angle carries 1000 yds. All .22 ammunition should be labelled by the makers 'Dangerous within a mile.'"

It is the lack of knowledge of the deadly power of what some people consider a toy that is causing many farmers to bar shooting with it on their land. During the summer, the shooting of gophers and other pests, and rabbit hunting during the winter months, may appear a harmless sport. But the risk of death or injury to stock or person is too great a price to pay to grant such privileges. Most dangerous of all is firing at aerial targets set upon a post or on a tree, for the angle above horizontal at which such target is situated increases the danger.

THE SUN BOOK SHOP.

School Supplies Our Specialty.

We have on hand Used Text Books for High School and Public School grades, to be disposed of on reasonable terms.

WE TAKE ORDERS FOR TEXT BOOKS ISSUED BY THE DEPT. OF EDUCATION; AND ALSO FOR ALL BOOKS ISSUED BY THE INSTITUTE OF APPLIED ART, EDMONTON

Waterman's Ink,

2-oz., pints & quarts. Also Peerless Ink, 2-oz. & pints.

India Ink

Reeves's 3-oz. 19c.

Pencils,

a large variety on hand.

Social Crediters Hold Caucus

Attended by 87 Provincial and Federal members, there being only 4 absentees, the first Social Credit caucus in Edmonton opened on Monday morning in the Council chamber at the Legislative buildings. Premier Aberhart and R.J. Magor, Montreal actuary and industrial expert who is here to reorganise Government departments and deal with means of balancing the budget, were the two speakers at the session. Hon. J.W. Hugill, Attorney-general, presided.

Hard-surfaced Highways.

Will Alberta see a program of hard surfaced roads initiated by the new Provincial Government in the next year? That is a question which is creating much attention now in road construction and motor-driving circles.

Recently there was a report that three major oil companies operating in this Province are considering a plan under which they would finance the building of paved or hard surfaced roads if the Government would rebate to them 10 per gallon of gasoline tax revenue each year until the advance was repaid. It was estimated that this rebate would amount to \$30,000 a year.

While no proposition of the kind has been submitted, the Government is known to be interested in the suggestion. If the proposal is made, it no doubt will receive every consideration.

One prominent member of the Government is said to have expressed the opinion that a great mistake was made when Alberta did not commence, years ago in building hard surfaced highways. If this had been done, the province would have been saved its heavy maintenance costs during recent years.

President Mackay of Alberta Motor Ass'n has given much time to pointing out that Alberta has a crying need for hard surfaced roads if this province is to reap the full benefit from the lucrative tourist trade now anxious to enter this province in ever increasing volume.

One Good Sleep.

Two Buffalo Irishmen, roomed in an 8-story apartment, on the top floor, and couldn't sleep on Sunday morning as the sun would shine in the windows and wake them up. So they bought some black paint and painted the windows, and lay down to sleep. When they woke up they realised they would be late for work, as it was 8.15. They rushed to their jobs, and the foreman looked at them in bewilderment, when Pat remarked:

"Faith, and what's the matter, boss? We're only twenty minutes late."

"Twenty minutes late?" yells the foreman. "Where were you Monday and Tuesday?"

Open Seasons for Game.

Deer, moose, Nov. 1 to Dec. 14
Ducks, geese, Sept. 16 to Nov. 14
Elk, Oct. 1—Dec. 14
Grouse, Oct. 1—10
Hungarian Partridge, Oct. 1—Nov. 30

Fox, Nov. 1—Jan. 31
Mink, martin, otter, Nov. 1—March 31
Muskrat, Mar. 1—April 30
South of N. Saskatchewan river, no open season.
Sunday shooting is prohibited.
Licenses may be procured at the Sun office.

The Rifle Club Dance

The dance committee of the Rifle Club are to be congratulated on the success of the club's dance last Friday night, in Stony Plain. The affair was voted highly successful, and in line with the annual dances which the club has sponsored in the past. Barth's orchestra supplied the music.

Netted Gem Is a Light Crop.

The Edmonton district is said to have sufficient potatoes for its own present needs but, in view of export shipping now under way, a shortage may develop before the Spring, according to Government officials. It is regarded as unlikely that any considerable quantity of potatoes will have to be shipped from outside points, however. J.W. Marritt, inspector the Dominion Seed Branch, found in a recent survey that there was a light crop of Netted Gem variety in Southern Alberta irrigated areas. Edmonton district crop is 75 per cent of normal, with some damage having been done by August frosts.

Obliging a Constituent.

"Say, Senator, you promised me a job."
"But there are no jobs."
"I need a job, Senator."
"Well, I'll tell you—I'll ask for a Commission to investigate why there are no jobs, and you can get a job on that."

That Settled It.

"Why did the new woman's club break up so soon?"
"The majority voted to have the three oldest women constitute the board."

Notice of Sale of Impounded Animals.

Under the Domestic Animals Act (Municipalities)

To Whom It May Concern:

NOTICE is hereby given that by virtue of power granted under Sec. 44 of The Domestic Animals Act (Municipalities) and of Bylaw No. 1 of the Municipality of Ings No. 520, Dated July 25, 1933, One Bay Mare, no visible brand, white star on forehead, weight about 1300 pounds, about 9 years old, will be sold at the Pound kept by the undersigned, on the North half of Sec. 26, Tp. 52, Range 1, West of the 5th Meridian, at 1 o'clock, on Tuesday, the 28th day of November, 1935.

Bazaar, Sat. Nov. 30.

The Ladies Aid of St. Matthew's Church (Missouri Synod) will hold a Bazaar on Sat. Nov. 30, St. Matthew's School, Stony Plain.

Russian Wheat Situation

Russia has been producing in recent years, on the average, about 850 million bushels of wheat per annum. This year it is said she has a bumper crop—some consider over 1,000 million bushels. Her population has greatly increased in the last ten years. The Soviet is now permitting the people to use more bread. Considering these factors, how much wheat will Russia have to spare for export to world's markets? Only time will show.
